Kobozev, N. I.
IS QUENCHING NECESSARY IN THE THERMAL CRACKING OF METHANE TO ACETYLENE? [1961]
6p. 3 refs.
Order from OTS or SLA $1.10 61-16979

Trans. of [Akademiya Nauk SSSR]. Comptes Rendus (Doklady) de l'Academie des Sciences de l'U. R. S. S., 1943, v. 39, p. 261-264.

DESCRIPTORS: *Methanes, Decomposition, Acetylenes, Synthesis, Cooling.

Data are reported supporting the contention that cracking of methane to acetylene does not require quenching; and that quenching is, as a rule, even harmful to this process. Substitution of air cooling for water cooling was without influence on the total yield of unsaturates, but changed the ethylene-acetylene ratio in favor of the latter. (Author)
